

# ESPASMODIAN

## SOLUTION FOR INJECTION

**ESPASMODIAN** offers a unique dual-action formula: the antispasmodic effectiveness of Hyoscine Butylbromide combined with the proven analgesic properties of Metamizole. This special combination allows cramped muscles to relax and simultaneously delivers fast relief from pain associated with spasms. Furthermore, both active ingredients have antispasmodic activity, being the therapeutic action more complete and faster.

The result of this association is a spasmolytic, analgesic, anti-pyretic and anti-inflammatory product very effective for treating all painful and spasmodic states of gastro-intestinal tract, bile ducts and urogenital system.

**ESPASMODIAN** is effective within 6 hours, being normally enough one single administration in the treatment of gastro-intestinal symptoms such as vomiting, diarrhoea and abdominal cramps.

**ESPASMODIAN** is first choice treatment for spasmodic diarrhoeas used in veterinary medicine.

### COMPOSITION

Hyoscine (N-butyl bromide).....	400 mg
Metamizole.....	50 g
Excipient to.....	100 ml
