

# VITAMINA AD3E COMPLEX

## ORAL SOLUTION

VITAMINS A, D, E play a very important role in the animal organism.

A deficiency of any one of these vitamins has serious consequences on the animals' productive capacity. The present intensive production methods cause a very high stress situation on the animals which could result in deficiencies of some of these vitamins.

### COMPOSITION

Vitamin A.....	100.000 IU
Vitamin D <sub>3</sub> .....	20.000 IU
Vitamin E.....	40 mg
Excipient to.....	100 ml

### BENEFITS

- Improves egg hatchability.
- Improves bone mineralization avoiding the development of rickets.
- Increases the immune system responsiveness and, therefore, reduces frequency and severity of many infectious diseases.
- Improves fertility and reduces the incidence of some reproductive disorders in several species.
- Reduces the incidence of retained placenta.
- Increases growth and development.
- Increases meat quality and shelf life.
