

# VITAMINAS A.D.E.

## INJECTABLE SOLUTION

**VITAMINAS A.D.E.** is an association of fat-soluble vitamins in a hydrosoluble form that provides a rapid absorption, distribution and a long hepatic storage once injected by intramuscular route. These properties are essential in order to achieve an effective treatment or preventive therapy.

**VITAMIN A** is an antiinfectious agent, which protects the tissues of the epithelial cells of the respiratory, gastrointestinal and genito-urinary tracts enabling them to maintain their resistance to infection. One of Vitamin A's most important physiological functions is the maintenance of the visual sense organs.

**VITAMIN D<sub>3</sub>** regulates calcium and phosphorus metabolism avoiding rickets and demineralisation (osteomalacia).

**VITAMIN E** plays a vital role in all the body cells and in the fertility of most animal species. It also protects alteration of substances that easily suffer oxidation (unsaturated fatty acids). Vitamin E maintains normal muscle metabolism and ensures good functioning of the central nervous system and vascular system.

### COMPOSITION

Vitamin A .....	10,000,000 IU
Vitamin D <sub>3</sub> .....	5,000,000 IU
Vitamin E .....	5 g
Excipient to .....	100 ml

### BENEFITS

- PREVENTION AND TREATMENT OF DEFICIENT STATES OF FAT-SOLUBLE VITAMINS.
- PLAYS A ROLE IN RESISTANCE TO MICROBIAL AND PARASITIC INFECTIONS.
- GROWTH STIMULANT.
- IMPROVES BONE MINERALIZATION AVOIDING RICKETS AND OSTEOMALACIA.
- IMPROVES REPRODUCTION / FERTILITY AND REDUCES INCIDENCE OF SOME REPRODUCTIVE DISORDERS.

### DOSAGE AND ADMINISTRATION ROUTE

Deep intramuscular route.

**Equine and bovine:** 5-10 ml of VITAMINAS A.D.E.

**Swine, ovine and caprine:** 2-5 ml of VITAMINAS A.D.E.

**Rabbits:** 0.1-0.2 ml of VITAMINAS A.D.E.

**Dogs:** 1-3 ml of VITAMINAS A.D.E.

### WITHDRAWAL PERIOD

Not required.

### PRESENTATION

Vials of 50 ml and 100 ml.
