

FOSVITAN

SOLUTION FOR INJECTION

FOSVITAN constitutes a pharmaceutical speciality indicated to replace any imbalance of Calcium, Phosphorus and Magnesium, which are indispensable for keeping the physiological functions in good working order. It contains Vitamin D, whose main role is to regulate the Calcium and Phosphorus metabolism, as well as a vitamin B complex which stimulates the nervous function and takes part in the essential elements metabolism.

FOSVITAN also provides aminoacids which, together with the Vitamins and minerals, have a strong anti-stress action, improve the development, increase the appetite and the organic defences.

COMPOSITION

Sodium hypophosphite.....	3.25 g
