

HEPATOPHYT

Feed additive

HEPATOPHYT is a feed additive that helps protect the functional integrity of the liver in ruminants.

COMPOSITION

HEPATOPHYT is constituted by a combination of plant extracts, glycogens substances and additives with rumen by-pass effect (choline chloride and amino acids).

HEPATOPHYT is indicated for

- Prepartum and early lactation, during 1 to 2 weeks.
- States of stress and/or intoxication by mycotoxins, antibiotics, etc.

DOSAGE AND ADMINISTRATION

Oral route mixed with feed.

- Bovine: 20-50 g/day
- Ovine and caprine: 2-5 g/day

PRESENTATION

Sachets of 1 kg
Bags of 25 kg
